Aonelite

关于“AONE”商标的严正声明

众所周知，我司从 2007 年起已经使用“AONE”以及“一创”作为我司商标，并在 2013 年初设计并使用了商标“一创AONE”进行商业推广。此商标已经为遍布世界各地的我司客户所熟知，已经积累了一定的美誉度。

但是，此商标由于与其他已注册的商标有近似性，导致我司此商标注册失败，无法成为一个受法律严格保护的注册商标。

另外一方面，我司发现，近年来市面上已经有其他厂家使用“AONE”或“A-ONE”进行灯具商业活动。特别恶劣的是，2017 年下半年，我司发现有其他人直接使用与我司相同形式的商标进行灯具商业活动 ，甚至参加我们经常参加的展览会，导致我们客户受蒙骗甚至造成损失，严重损害我司权益。我司不得不独一通知所有客户，以避免客户受损失。尽管我们与假冒者进行坚决的斗争，但是因为我司此商标为非注册商标，很难从法律上彻底保护我司和我司客户合法权益。

鉴于上述原因，我司董事会决定：我司从 2018 年4月1 日起启用四个新商标“Agilo Beatti Aonelite”，并进行商标注册和版权申请，彻底避免假冒分子的假冒行为。

自 2018 年4 月 1 日起，我司不再使用或不再单独使用我司旧商标“一创AONE”。凡单独使用我司旧商标的，则不是我司，而实为假冒者。恳请广大客户特别留意、识别，以避免上当受骗。

特此声明！

一创灯饰集团（香港）有限公司
潮州市万创灯饰有限公司
2018年4月1日

Declaration about our trade mark “AONE"

To all of our valued customers:

As most of our old customer know,since 2007,we, AONE LIGHTING GROUP, use “AONE” as our trade mark.Since 2013,we design and use logo" 一创AONE " as our trade mark.It is well knew by our customers all over the word.

But due to similarity with other registered trade marks,we failed to register our logo “一创AONE” as a registered trade mark. On the other hand,we found that several other companies also use "AONE" or "A-ONE" as their company name or logo of trade mark for marketing at present.Worse,we also found that some boby use trade mark which almostly exact as ours to pretend to be us and cheat our customers.It is terrible that they also attended some lighting fair we usually attend before.

We have been fighting with these fakes.But since our logo is not a registered trade mark,it is very difficult for us to pretect ourself and our valued customers.

In order to avoid further fack and protect ourself and our valued customers,the board of directors of our company decides that from April 1,2018,our company start to use new logos “Agilo Beatti Aonelite” as our new trade marks.We already start the registration of our new trade marks.We hope through our new trade marks to stop further fack completely.

From April 1,2018,if you found anybody use our old trade mark“一创AONE ",he should be a fake,!Please be careful to avoid any mistake or lost.

Thanks and best regards,

AONE LIGHTING GOUP (HK) LIMITED

- **Professional service**

  To pursuing "Customer first", we partner closely with our customers to provide excellent service and meet the needs to guarantee of their specific businesses with 20 years of experience and expertise,

Trend

Summer Plant Style

In the field of home decoration, there is a cool and beautiful Morandi wind, and some people prefer the summer style brought by tropical plants. The popularity of summer plant style is rapid and very tense, from the European continent to China, everywhere. Tropical plants with vigorous vitality ,radiate an optimistic and lovely temperament, and brings people to the fresh and wild rainforest. With such decorations, people at home are also like on vacation!

From plant printing wallpaper to plant decorative painting, from plant pattern tableware to plant printing pillow, from plant printing bed to plant printing curtain, there is a dazzling scene.

However, in the field of lighting, there are few plant-style lighting. We,AONE, have brought you a series of summer plant-style lighting, HAVEE family, in 2018.

HAVEE family lighting, have been grandly exhibited at Guangzhou International Lighting Exhibition in 2018, which attracts the attention of many domestic and foreign customers and has won the success of the exhibition.

Aonelite

Desinger Team

Design Story

Poppy Story

William Zhong

I am every excited on mixing Morandi colours,natural wood and traditional wire netting into one new work.

There is a static beauty in the Morandi color system with a mysterious and indifferent gray tone.

Wood is natural, pure and unadorned.It is amazing to return wood to be cup of light.

Wire netting is a traditional material with industrial feeling. The industrial style is rough, mysterious and full of personal characteristics.

Popular colours, new material, industrial style,a ground elements looks conflictive,but they are so harmonious in my new lighting work, POPPY family.

Hope Popply can bring you a wonderful feeling!

Hand-made Work

Hand-Making of Ceramic

With the development of science and technology, today's ceramic production technology has undergone tremendous changes, ceramic production technology continues to innovate and upgrade, but traditional handicraft technology still occupies an important position in ceramic art creation and production.

Mould-forming technology has been widely used in the production of modern ceramics.Workers use gypsum moulds to produce ,pour the mud into the moulds. According to the working procedure, most of mud in the mould is poured out successively. When the mud embryo of the mould is dry enough, the demoulding begins. At this moment, the complete ceramic embryo was produced.

After that, the most important step, manual repairing, began. After demoulding, because the surface of the ceramic body is not smooth, there are rough edges at the edges, and some of them still have die seams or slurry, so it needs to be further processed and trimmed, which is called manual repairment. Repairing is one of the most important processes in ceramic forming. Its main purpose is to make the surface of the ceramic more smooth, coherent and uniform. It is the key step to determine the perfection of the ceramic.

Embryo repairing depends on the experience and handicraft skills of embryo repair workers. Experienced technicians can clean the surface debris of the body, repair the pinholes and cracks on the surface of the ceramic embryo, and smooth the mold marks by repairing the embryo. Before glazing and firing, the ceramic embryo is repaired to a more perfect state, so as to improve the perfection and yield of finished ceramics.

Because of this, although with the help of mould, the production of ceramics still has a special manual personality, each product is unique in detail, different, not perfect enough. This is also the unique charm of ceramics.

For translucent-pocerlain lamp,different kind of bulbs,different lighting effects.
An incandescent lamp will lead to a warm-red color looking.
But an energy-saving lamp will lead to a cool-white color looking.
